Product Name	<b>Contrac Blox</b>	Date of Assessment	<b>2nd Jan 2026</b>
--------------	---------------------	--------------------	---------------------

Brief Description of the Product or Task	General use of pesticides in order to eradicate pest infestations.
--	--

Who is at risk from exposure to this product?	EPM Staff <input checked="" type="checkbox"/> Client Personnel <input checked="" type="checkbox"/> Public <input checked="" type="checkbox"/> Others <input checked="" type="checkbox"/>
---	--

Means of Exposure	Inhalation <input type="checkbox"/> Skin Contact <input checked="" type="checkbox"/> Eye Contact <input type="checkbox"/> Ingestion <input checked="" type="checkbox"/> Injection <input type="checkbox"/>
-------------------	--

Types of Workplace or locations the substance will be used	Customer Premises <input checked="" type="checkbox"/> Internal Areas <input checked="" type="checkbox"/> External Areas <input checked="" type="checkbox"/> Baiting Stations <input checked="" type="checkbox"/> In Building Voids <input checked="" type="checkbox"/> Cavities <input checked="" type="checkbox"/> Confined Spaces <input type="checkbox"/>
--	---

Frequency of Use	This product is likely to be used on a daily basis within locked tamperproof baiting stations.
------------------	--

## Hazard Identification

Product Name	Composition	Concentration	Colour
<b>Contrac Blox</b>	<b>Bromodiolone</b>	<b>0.005%</b>	<b>Blue</b>

Is this substance Highly Inflammable?	
	Yes <input type="checkbox"/> No <input checked="" type="checkbox"/> Comments:

Is this substance Corrosive?	
	Yes <input type="checkbox"/> No <input checked="" type="checkbox"/> Comments:

Is this substance an Irritant or Harmful?	
	Yes <input checked="" type="checkbox"/> No <input type="checkbox"/> Comments:

Is this substance Explosive?	
	Yes <input type="checkbox"/> No <input checked="" type="checkbox"/> Comments:

Is this substance Toxic?	
	Yes <input checked="" type="checkbox"/> No <input type="checkbox"/> Comments:

Is this substance an Oxidiser?	
	Yes <input type="checkbox"/> No <input checked="" type="checkbox"/> Comments:

Is this substance harmful to the Environment?	
	Yes <input checked="" type="checkbox"/> No <input type="checkbox"/> Comments:

Is this substance Carcinogenic?	
	Yes <input checked="" type="checkbox"/> No <input type="checkbox"/> Comments:

# COSHH Assessment

Product Name

**Contra Blox**

Date of Assessment

**2nd Jan 2026**

**UK** A ready to use wax block containing bromadiolone (0.005% w/w) for use as a rodenticide by the Professional Users with Demonstrated Competence (equipment to Trained Professionals) for the control of rats and mice indoors, outdoors around buildings, in burrows, in outdoor open areas and waste dumps, and in sewers, for the protection of public health, stored products and materials.

It is illegal to use this product for uses or in a manner other than that prescribed on this label.

Not for sale to the general public

Active substance: Bromadiolone 0.005% w/w (CAS-Nr.: 28772-56-7)

**Against mice and rats (adults and juvenile)**

For use by Professional Users with Demonstrated Competence only

This product contains a bittering agent and a dye

Authorisation Number: UK-2015-0941

**Read inserted leaflet and instructions before use.**

**First aid instructions:**  
This product contains an anticoagulant substance. If ingested, symptoms, which may be delayed, may include reddened and bleeding gums. In severe cases, there may be bruising and blood present in the faeces or urine.

**Antidote:** Vitamin K1 administered by medical/veterinary personnel only

In case of:  
**Dermal exposure:** wash skin with water and then with water and soap.  
**Eye exposure:** rinse eyes with eyes-rinse liquid or water. Keep eyes open for at least 10 minutes.  
**Oral exposure:** rinse mouth carefully with water. Never give anything by mouth to unconscious persons. Do not provide vomiting. If swallowed, seek medical advice immediately and show the product's container or label.  
Contact a veterinary surgeon in case of ingestion by a pet.

**Hazardous to wildlife.**

**Poison Information:** UK medical professionals should contact the National Poisons Information Service (www.npis.org) for further advice.

**Sale/Disposal of the product and its packaging:**  
At the end of the treatment, dispose of unopened bait and the packaging in accordance with local laws. Use of gloves is recommended. For information on disposal in the UK contact the Environment Agency (<http://www.environment-agency.gov.uk>) or in Scotland (<http://www.scotland.gov.uk>)

## CONTRA BLOX™

### KILLS RATS & MICE

**NET WEIGHT: 8 kg**  
**28g Blox**

Contact a veterinary surgeon in case of ingestion by a pet.

**Hazardous to wildlife.**

**Poison Information:** For information or to report a poisoning incident contact The National Poisons Information Centre, Beaumont Hospital, Dublin (01-409 2166), retain the label for reference.

**Disposal of unopened bait:**  
At the end of the treatment, dispose of unopened bait and the packaging in accordance with EPA requirements for the disposal of hazardous waste. Use of gloves is recommended.

**Disposal of dead rodents:**  
Dispose of dead rodents in accordance with local requirements, using one of the following methods of disposal (in order of preference): in an on-site or off-site small capacity incinerator; in the site's or farm's domestic waste; in the site's or farm's normal non-hazardous waste; or by burial on-site, but away from sensitive areas.

6773 020203-20 Product Code 91340

**UK 28g Blox** Active substance: Bromadiolone 0.005% w/w (CAS-Nr.: 28772-56-7)

**Instructions for use:**  
To be used only by professional users holding certification demonstrating compliance with UK rodenticide use requirements.

**Read and follow the product information as well as any information accompanying the product or provided at the point of sale before using it.** Using this product in a manner that is inconsistent with the label may be an offence. Refer to the CRUK UK Code of Best Practice (UK) or equivalent for guidance.

When this product is applied to a site, the control of rodents, it shall only be applied to a professional user holding certification demonstrating compliance with UK rodenticide use requirements.

Carry out a pre-baiting survey of the infested area and an on-site assessment in order to identify the rodent species, their places of activity and determine the likely cause and the extent of the infestation. Remove food which is readily available to rodents (e.g. spilled grain or food waste). Apart from this, do not close up the infested area until just before the treatment, as this may disturb the rodent population and make bait acceptance more difficult to achieve.

Permanent baiting is a highly effective method of rodent control. Permanent baiting is a highly effective method of rodent control. Permanent baiting is a highly effective method of rodent control.

**Instructions for use in sewers:**  
For any other agent (other than Rattus norvegicus), adult and juvenile.

For the application in sewer systems, the ready-to-use bait to be anchored or applied to bait stations or covered and protected bait points in a manner which prevents the bait from getting into contact with waste water.

Do not use the product in public building treatment.

Up to 225 g per manhole.

Bait should be applied in a way so that they do not come into contact with water and are not washed away.

**Risk mitigation measures:**  
When possible, prior to the treatment inform any possible bystanders (e.g. users of the treated area and their surroundings) about the relevant control campaign.

Do not use in areas where resistance to the active substance can be expected.

Products shall not be used beyond 35 days without an evaluation of the state of the infestation and of the efficacy of the treatment (unless permanent baiting).

Do not use in the case of different rodenticides with (disposable or water-soluble) rodenticides, (available, or a more potent rodenticide).

Do not use the bait stations outdoors used to control and protect bait points with water between applications.

Disposal of dead rodents: Dispose of dead rodents in accordance with local requirements, using one of the following methods of disposal (in order of preference): in an on-site or off-site small capacity incinerator; in the site's or farm's domestic waste; in the site's or farm's normal non-hazardous waste; or by burial on-site, but away from sensitive areas.
