In line with the requirements of the Control of Asbestos Regulations 2012 our training covers the following topics as identified in Regulation 10.

- (i) the properties of asbestos and its effects on health, including its interaction with smoking,
- (ii) the types of products or materials likely to contain asbestos,
- (iii) the operations which could result in asbestos exposure and the importance of preventive controls to minimise exposure,
- (iv) safe work practices, control measures, and protective equipment,
- (v) the purpose, choice, limitations, proper use and maintenance of respiratory protective equipment,
 - (vi) emergency procedures,
 - (vii) hygiene requirements,
 - (viii) decontamination procedures,
 - (ix) waste handling procedures,
- (x) medical examination requirements, and
- (xi) the control limit and the need for air monitoring, in order to safeguard themselves and other employees.

Our General Awareness training has been independently audited by the IATP for your peace of mind who have confirmed through documentary evidence that our asbestos awareness training is compliant with the Regulations.

In addition to those topics above this enhanced training course covers the following additional modules:

M&S Specific Training with consideration of the Retail Asbestos Working Guide.
